📍 Thu Duc, Ho Chi Minh City

ABOUT ME

Final-year Software Engineering student at HUTECH University with hands-on experience in backend development (Node.js, Express, SQL) and infrastructure (Docker, Oracle Cloud, nginx). My goal is to start as a Backend Intern, then grow toward a DevOps/Infrastructure role — focusing on containerization, deployment pipelines, and cloud environments rather than application code.

EDUCATION

2022 – Present

HUTECH UNIVERSITY | SOFTWARE ENGINEERING

- Hands-on experience with backend systems, web development, and cloud deployment

PROJECTS

9/2025 – 10/2025

LIVE SUPPORT & TICKET SYSTEM

Independent Developer · 1 person · github.com/lethien999/my-live-support-2025

Real-time customer support system similar to chat platforms.

- Built backend with Node.js, Express, TypeScript (RESTful APIs)
- Implemented JWT authentication, role-based access (Admin/Agent/User)
- Used Socket.IO for real-time messaging
- Designed database with SQL Server (39 tables)
- Deployed with Docker Compose

2024

STUDENT ACCOMMODATION PORTAL

Independent Developer · github.com/lethien999/student-accommodation_portal

Platform for students to find rooms, sign contracts, and track payments.

- Backend: Node.js, Express, Sequelize ORM
- Database: PostgreSQL/MySQL
- Implemented JWT + 2FA authentication, Redis caching
- Deployed on Oracle Cloud with Docker + Nginx (HTTPS)

SKILLS

BACKEND

- Node.js
- Express
- REST API

DATABASE

- SQL Server
- PostgreSQL
- MySQL

TOOLS

- Docker
- Redis
- Git, GitHub

OTHERS

- JWT Auth
- Socket.IO
- Nginx
- CI/CD basic
